

Manual mobile system, mod. Challenge

Manual mobile system, mod. Challenge

Basketball system with oil-hydraulic function, structure in hot galvanized steel profile; perpendicular and height adjustment of the board.

Basket/ rest positioning movement obtained by manual hydraulic pump with non-return valve and removable control rod. Displacement and positioning of the system takes place by means of 4 wheels, 2 castors and 2 fixed ones, which are automatically lowered when the system is closed and make it easily transportable. Set of wooden guards covered

in washable sky, placed also under the horizontal support of the backboard.

12 mm safety glass scoreboards with steel frame, subframe and protections, reclining baskets and nets, back ballast already incorporated and protected.

24 seconds indicator applied in the center of frontal protection pad.

Measures on the ground of the base: 130x180cm Measures of the folded system: 350x130x140h cm. Scoreboard: 180x105cm

Overhang: 225cm

Ballast weight 900kg
